TANVI JAWARE

Software Developer Intern | Full Stack · Java · Python · C++ · DSA · AWS · Linux · DevOps · CI/CD

Virar, MH | +91 9867041496 | vibhavari.14092006@gmail.com | LinkedIn | GitHub | Portfolio | LeetCode

PROFILE

B.Tech IT student (CGPA 9.83) seeking a Software Developer Intern role. I build end-to-end full-stack web applications with HTML, CSS, JavaScript, TypeScript, React and Python (FastAPI, Flask) REST APIs, and write Java, Python and C++ with strong data structures and algorithms (208+ LeetCode problems solved). Hands-on with AWS, Linux, Docker, Kubernetes and CI/CD (GitHub Actions) from a cloud internship and the L&T DevOps bootcamp. Skilled in testing, debugging, troubleshooting and documentation; team experience in SIH 2026. Public portfolio and 22 GitHub repositories.

TECHNICAL SKILLS

Languages & DSA: Python, Java, C++, C, JavaScript, TypeScript, SQL | Data structures & algorithms, problem solving, debugging | LeetCode: 208+ solved

Full-Stack & APIs: HTML, CSS, React, Vite, Tailwind CSS, REST APIs, FastAPI, Flask, WebSocket, full-stack web development

Databases: MySQL, PostgreSQL, SQLite, Firebase (NoSQL), Supabase

Cloud, DevOps & Linux: AWS (EC2, S3, IAM, VPC), Linux, Bash scripting, Docker, Kubernetes, GitHub Actions CI/CD, Jenkins, Terraform, Prometheus, Grafana

Tools & Practices: Git/GitHub, OOP, testing & debugging, code documentation, Agile teamwork

PROJECTS

Vaani Kavach — Real-Time Voice-Clone Detection (Smart India Hackathon 2026) *2026*

React, Vite, FastAPI, WebSocket, Supabase, Python, Hugging Face Transformers

- Full-stack team project (6 members, PS 26104, AICTE Cyber Security Cell): React + Vite frontend, FastAPI backend with REST + WebSocket APIs for real-time detection of voice cloning, and Supabase auth/history. My role: DevOps and AI/ML.

AgriFlow AI — Smart Irrigation Advisor for Small Farmers *Oct 2026*

React, Vite, TypeScript, Python, FastAPI, scikit-learn

- Built a full-stack irrigation advisor: React + Vite + TypeScript UI connected to a FastAPI endpoint serving a Random Forest model (~99.58% accuracy on held-out test split), plus a rule-based layer returning irrigation duration and a plain-language explanation.

SkillSwap — Student–Mentor Matching Platform *Sep 2026*

React, Vite, Tailwind CSS, JavaScript | github.com/Tanvi-1496/SkillSwap-Learn.-Mentor.-Grow.

- Built an 11-page React + Vite + Tailwind frontend: landing, auth, mentor search, mentor profile, booking flow, mentee/mentor/admin dashboards and AI chat; backend with SBERT-based mentor matching in progress.

Facility Management System (FMGT) *Jun – Aug 2025*

Java, Android Studio, XML, Firebase | github.com/Tanvi-1496/Facility-Management-Mobile-Application-

- Built a real-time Firebase-backed Android app supporting 50+ facility operations; delivered fully documented, production-ready software within 3 months using OOP and structured data modelling.

Other projects: *Spotify clone, JOINUS Event Management System, Gym website, Car-rental app, DMart Retail Analytics Dashboard, Secure Stream (DevSecOps CI/CD), Kubernetes self-healing app* | github.com/Tanvi-1496

EXPERIENCE

Cloud Intern — Crossasyst Pvt Ltd *Jun – Jul 2024*

Mumbai, India

- Provisioned 5+ AWS EC2 instances, configured S3 bucket policies with versioning, and enforced least-privilege IAM roles across 3 environments in a live production cloud setup.
- Documented cloud deployment workflows and collaborated within a professional engineering team, contributing to faster onboarding for new members.

CERTIFICATIONS & TRAINING

Residential DevOps Bootcamp — L&T Leadership Development Centre, Mumbai [Certified] *Jun – Jul 2026*

EDUCATION

B.Tech, Information Technology | Vidyalankar Institute of Technology, Mumbai *Aug 2025 – Present*

CGPA: 9.83 (Sem IV) | Lateral Entry

Diploma, Information Technology | Vidyalankar Polytechnic, University of Mumbai *Jun 2022 – Jun 2025*

Score: 91.75%
